Ubuntu Overview

First Things First: Debian Overview

- Debian contains what is approaching **15,000** packages (and growing by 5 each day)
- Debian involves the work of **1,000** official developers and *many others*
- Debian includes the work of many companies and organizations
- Debian is **100% free software**

Things Debian Does Well

There are some things Debian does very well:

- Supporting **many** packages
- Involving a **huge** volunteer base
- Strong commitment to Free Software philosophy
- Excellent package management tools: apt-get, synaptic, etc.
- Consistent and enforced policy

Things Debian Doesn't Do Quite As Well

- Releasing
- Being easy to use (especially the installer)
- Consistent desktop installer
- Responsibility (in the corporate or institutional sense)

Ubuntu is Born

Releases

Ubuntu Releases Debian Every Six Months

- Based on Debian *unstable*
- Released twice a year, every 6 months.
- Eighteen months of support for each release
- Easily upgradeable

Usability

- Simple installer
- GNOME
- Consistency + Simplicity

Emphasis on the Desktop

Corporate/Institutional Accountability

Canonical Ltd. offers services and support

Philosophy

Ubuntu participates in the Debian Community and borrows the Community Model. We believe that:

- Every computer user should have the freedom to run, copy, distribute, study, share, change and improve their software for any purpose, without paying licensing fees.
- Every computer user should be able to use their software in the language of their choice.
- Every computer user should be given every opportunity to use software, even if they work under a disability.

Other Areas We Focus

- GNOME
- Python
- Security

The logo features the text "Ubuntu Development Model" in a bold, black, sans-serif font. The letters are partially obscured by overlapping, semi-transparent orange and red organic shapes resembling petals or leaves.
